

Vaishnavi Singh Parihar

vaishnavi9853@gmail.com — LinkedIn — GitHub — +91 9301951352

Professional Summary

Computer Science student specializing in Cloud Computing with a strong foundation in AI/ML and Python. Experienced in building and deploying machine learning models using scikit-learn, NumPy, and Pandas, with knowledge of data preprocessing and model evaluation. Interested in developing intelligent systems using Natural Language Processing (NLP) and Large Language Models (LLMs), with exposure to generative AI and prompt engineering. Passionate about building scalable, real-world AI solutions.

Education

Vellore Institute of Technology

Bachelor of Technology Computer Science Engineering
CGPA: 7.32

Bhopal, Madhya Pradesh
2022-2026

Experience

Virtual Internship — Smart Bridge & Smart Internz

Program: Google Cloud Generative AI

Duration: 05 Nov 2025 – 15 Jan 2026

Worked with Generative AI and Large Language Models (LLMs) using Google Cloud tools. Gained hands-on exposure to prompt engineering, text generation, and NLP-based tasks, building and experimenting with AI workflows on Vertex AI.

Summer Training Program — E & ICT Academy, IIT Kanpur

(A Joint Initiative of MeitY & IIT Kanpur)

Duration: 16 June 2023 – 15 July 2023

Program: Python for Data Science

Completed training in Python, data analysis, and visualization using NumPy and Pandas, with practical exposure to data preprocessing and problem-solving.

Projects

Mental Health Support System (Tech: Python, AI/ML, LLM, NLP, Scikit-learn, Pandas, NumPy, Flask) [GITHUB](#)

- Developed a machine learning-based web application to predict depression levels and generate AI-driven insights.
- Applied data preprocessing, feature engineering, and trained a Random Forest classification model.
- Evaluated model performance using accuracy and classification metrics.
- Deployed using Flask for real-time predictions and user interaction.

OCR Image-to-Text Converter (Tech: Python, AI/ML, OpenCV, Tesseract OCR, NLP, Flask) [GITHUB](#)

- Developed an OCR-based application to extract text from images using Tesseract OCR.
- Applied preprocessing techniques (grayscale, thresholding, noise reduction) to improve accuracy.
- Built a Flask-based interface for real-time text extraction with error handling.
- Designed output pipeline adaptable for text processing and basic NLP tasks.

Auto Syntax - SaaS Code Editor (Next.js, TypeScript, Convex, Clerk, APIs) [GITHUB](#)

- Developed a full-stack SaaS code editor supporting 10+ programming languages.
- Implemented authentication, API integrations, and smart output rendering.
- Built scalable features including theming, monetization, and access control.
- Collaborated on backend integration and application workflows.

Technical Skills

AI/ML: Machine Learning, Natural Language Processing (NLP), Generative AI, Large Language Models (LLMs), Prompt Engineering, Model Evaluation, Scikit-learn, OCR

Programming: Python, Java

Data Tools: NumPy, Pandas

Cloud/Tools: AWS, Google Cloud (Vertex AI), Docker, Git, GitHub

Web/Frameworks: Flask, JavaScript, React, Next.js, HTML, SQL

Certificates

Certification Skills: Fundamentals of AI and ML, The Bits and Bytes of Computer Network, Python Essentials, Python for Data Science, Cyber Security Analyst, Salesforce Developer, Prompt Design in Vertex AI, Git & GitHub for beginners, Google Cloud Generative AI

Global Certificate: AWS Certified Cloud Practitioner certification

Language: English, Hindi
