

Vaishnavi Singh Parihar

vaishnavi9853@gmail.com — LinkedIn — GitHub — +91 9301951352 — Codeforces

Professional Summary

Detail-oriented Computer Science student with experience in developing SaaS-based applications, API integrations, and data-driven solutions. Skilled in coordinating projects, documenting workflows, and building scalable systems aligned with business and user needs. Strong ability to bridge technical development with real-world product and operational requirements.

Education

Vellore Institute of Technology Bhopal, Madhya Pradesh

Bachelor of Technology Computer Science Engineering

2022-2026

CGPA: 7.32

Experience

Summer Training Program — E & ICT Academy, IIT Kanpur

(A Joint Initiative of MeitY & IIT Kanpur)

Duration: 16 June 2023 – 15 July 2023

Program: Python for Data Science

Completed hands-on training in Python, data analysis, and visualization using NumPy and Pandas, strengthening data-driven problem-solving skills.

Virtual Internship — Smart Bridge & Smart Internz

Program: Google Cloud Generative AI

Duration: 05 Nov 2025 – 15 Jan 2026

Gained practical exposure to generative AI concepts and worked with cloud-based tools and workflows.

Projects

Auto Syntax - SaaS Code Editor

GITHUB

Technologies Used - Next.js 15, TypeScript, Convex, Clerk, Tailwind CSS, Lemon Squeezy

- Developed a full-stack SaaS code editor supporting 10+ programming languages with real-time execution.
- Designed backend architecture with API-driven workflows and webhook integrations.
- Implemented authentication and subscription-based access control.
- Improved execution reliability across 300+ test cases using structured output handling.

OCR Image-to-Text Converter

GITHUB

- Built a Flask-based OCR system using Tesseract for text extraction from images.
- Designed preprocessing and backend pipelines for accurate and reliable output.
- Implemented input validation and error handling to ensure system stability.

Mental Health Support Model

GITHUB

- Developed an ML-based web application using Flask to predict depression levels.
- Applied data preprocessing and feature engineering using scikit-learn.
- Integrated the model with backend APIs for real-time predictions.

Technical Skills

Programming: Java, Python, HTML

Frontend: JavaScript, React, Next.js

Backend: MySQL, Node.js

Developer Tool: GitHub, AWS

Concepts: REST APIs, SaaS Architecture

Skills

- **Product & Business Understanding:** SaaS platforms, API integrations, and customer-focused solutions.
- **Communication & Coordination:** Clear technical communication and effective teamwork.
- **Analytical Thinking:** Logical, data-driven problem-solving approach.
- **Documentation:** Structured reporting and workflow documentation.
- **Operations Mindset:** Focus on reliability, error handling, and user experience.
- **Attention to Detail:** High accuracy and quality output.

Additional Information

Interest/Hobbies: Editing, yoga, sports, gamer, reading

Certification Skills: Fundamentals of AI and ML, The Bits and Bytes of Computer Network, Python Essentials, Python for Data Science, Cyber Security Analyst, Salesforce Developer, Prompt Design in Vertex AI, Git & GitHub for beginners, Google Cloud Generative AI

Global Certificate: AWS Certified Cloud Practitioner certification

Language: English, Hindi
